

Radioactive Cesium (Fukushima Prefecture)

Estimated Radioactive Material Concentration for Farmland Soil in Fukushima Prefecture

(Note 1) The distribution in farmland is based on the Farmland Soil Distribution Map (reflecting the distribution in 2001) that was prepared and released in 2010 by the National Institute for Agro-Environmental Sciences (at that time).

(Note 2) Estimates are based on the measurement results of ambient dose rates obtained through the airborne monitoring (published by the Nuclear Regulation Authority on October 25, 2021) and contain certain errors.

The concentration values converted into values as of Oct. 25, 2021 were used for mapping.

"Publication of Radioactive Material Concentration Distribution Map for Farmland Soil" released by the Ministry of Agriculture, Forestry and Fisheries (MAFF) on May 10, 2023
