

Adaptation to Climate Change based on Science and Technology in Developing Countries

-How can we address such needs effectively?-

Adaptation to Climate Change

Vulnerability Assessment

Modeling & Data Collection

Other Capacity-Assessment

Adaptation

(planning & implementation)

Integration into Decision-Making

Integrated Planning & Implementation

✓ Domestic Efforts

- Good Practice for replication
- Lessons Learned

• Needs & Gap still existing ??

✓ International /Regional Cooperation Framework
(Technical & Financial Assistance/ Regional Network)

Discussion 6

Enabling Efforts through International & Regional Cooperation

How international and regional cooperation can support national efforts?

Introduction of
country cases

Introduction of
cooperation approaches

- ✓ Identifying/identified adaptive capacity needs
- ✓ Examples of international cooperation to address them
- ✓ Cooperative actions at global, regional and national-level

What are

- Entry points/pre-requisites for cooperation?
- What are effective functions at international level?
- What are necessary arrangement at domestic level?
