Integrating Climate Change Risks and Resilience into Forestry Management in Samoa

Location: Samoa

Adaptation Issue: Forest resources that provides livelihoods and ecosystem functions are at risk

Adaptation Practice: (1) Strengthen national forestry policy framework through enhanced institutional coordination and development of a forest fire prevention strategy and early warning system; (2) detailed vulnerability assessments, rehabilitation of degraded native forestry areas using climate-resilient native species and introduction of climate resilient crops, cultivation techniques and climate sensitive land management.

Source of Information: UNDP Multi-country Office – Samoa

Grant: \$2.5m (LDCF)

Co-financing: \$ 2.5m

Maintaining water security in critical catchments through ecosystem based adaptation

Location: Mongolia

Adaptation Issue: Critical water provisioning functions of ecosystems at risk from climate change

Adaptation Practice: (1) restoration of alpine ecosystems to enhance soil-water infiltration and water storage capacity; (2) integrated management of wildfires to protect forest steppe and steppe ecosystems; (3) rehabilitation of wells and old water collection reservoirs, as well as renovation of water harvesting structures; (4) raising awareness at all levels about how ecosystems contribute to reducing vulnerability; (5) land use planning decisions changed to reflect EBA.

Promoting climate resilient infrastructure in the Northern Mountains Provinces of Vietnam

Location: Viet Nam, Northern Mountains

Adaptation Issue: Rural infra. is degrading due to increased water volumes, siltation and landslips

Adaptation Practice: The resilience of critical economic infrastructure will be increased through: (1) cost-effective measures to climate proof rural roads, irrigation and river embankments; (2) develop provincial strategies for climate proofing rural infrastructure based on vulnerability assessment and capacity development activities and integrate them into Provincial Development Plans; and (4) provide technical guidance to revise relevant national construction codes and standards.

Source of Information: Adaptation Learning Mechanism (<http://www.adaptationlearning.net>)

Grant: \$3.4m (SCCF)

Co-financing: \$ 148.5m

Contact: Angus Mackay, UNDP A-P Regional Technical Advisor (angus.mackay@undp.org)
