- Why are PKWS Zoning and Management Plan Important? How?
- Communication and Advocacy Efforts Leading to Zoning and PKWS Management Success

Background of Peam Krasop Wildlife Sanctuary

- Located in south-western Cambodia in Koh Kong Province
- 2. Established in 1993 by Royal Degree, covering the area of **25,897** hectare to protect part of one of the most important mangrove areas in Cambodia.
- 3. About 9,000 people are living in this sanctuary and depend on ecological services to sustain their fisheries-based livelihoods

Map of Peam Krasop Wildlife Sanctuary

Current Threats to PKWS

Severe landward beach migration

Destruction of mangrove habitat caused by erosion in Peam Krasop and Koh Kachang Beach in PKWS

Beach migration

- ➤ Maximum beach barrier migration landwards is 390 m between 1973 and 2011 (10.3 m per year)
- ➤ Mangrove forest loss due to beach barrier migration is 0.60 km² since 1973
- The most rapid rate of migration is during the most recent period

Limited Access to Freshwater

Development of PKWS Management Plan is Crucial to effective Management of Protected Area
