

Table1 State of PCB Waste in Storage

(As of March 31, 2004)

Type of PCB Waste	Number of Business Entities Storing PCB Waste	Amount under Storage
High-voltage transformers	2,688	18,687 units
High-voltage capacitors	45,533	250,739 units
Low-voltage transformers	427	35,949 units
Low-voltage capacitors	3,520	1,836,705 units
Pole-mounted transformers	153	2,146,581 units
Ballasts	12,358	5,551,983 units
PCBs	206	53 tons
PCB-containing oil	1,060	176,489 tons
Carbonless copying paper	416	668 tons
Waste cloth	886	225 tons
Sludge	179	15,411 tons
Other appliances	1,819	114,915 units

Note: Stored PCBs that cannot be represented by units or weight, such as those stored in drums, are listed under the number of business entities. Data on PCBs, PCB-containing oil, carbonless copying paper, waste cloth, and sludge represented in volume were converted to weight, by calculating one liter as one kilogram.
