

Group B Recommendation

- Better structured communication system between CA and customs at the national level connected with communication system among CAs using Asian Network
- Follow up with and strengthened cooperation with current Basel discussion in PACE, CLI and other relevant works on ESM standards

Group B Recommendation

- Risk management approach recognizing companies and individuals may deliberately misdeclare / misclassify the use of customs code to illegally export the hazardous wastes. Share the intelligence information on the list of company, HS codes, treatment facility with high risks.
- Ensure member countries to notify SBC on national regulations and review already notified information to be up-to-date. Sharing the notified information among the Asian Network
