

# Global Trend of the TBM of Recyclable Wastes

By Ms. Chomkwan Akamanon  
Department of Industrial Works

# Trend of Import of Plastic Scraps

Amount of Plastic Scrap (Kilo Tonne)

# Situation of Plastic Waste in Thailand, 2017

Generation rate  
2 million tons  
(12 %)

Reuse &  
Recycling  
0.5 million  
tons

Disposal 1.5  
million tons

Need  
management

Residue in the  
environment

Import : 0.15 Mt  
(Average price: 6 BTH/kg)

Raw material  
in a factory

Export : 0.29 Mt  
(Average price: 19 BTH/kg)

---

# **Update of Policies / regulations in Thailand**

# Plastic Scraps

1. Phase down and phase out within 2 years
2. Promote the use of domestic plastic wastes by set up an efficient system for sorting domestic waste
3. Review and revise laws & regulations related to import of plastic scrap
4. Tightened cargo inspection by Customs authorities for imported plastic scrap
5. Inspection recycling factories throughout the countries

# Metal Scraps

## Metal Scraps

Currently, no import license/permit is required

## New policy for imported metal scraps

- Metal scraps should be single type, no mix metal scraps is allowed
- Certification for metal scrap grade/quality is required for import
