

(News Release)

## The Results of Water Quality Surveys of Radioactive Materials at Bathing Area

Monday, November 14, 2011  
Water Environment Division,  
Environment Management Bureau,  
Ministry of the Environment  
Direct line: 03-5521-8316  
Switchboard: 03-3581-3351  
Director: Nobuo Yoshida (ext. 6610)  
Deputy Director: Tetsuo Furuta (ext. 6614)  
Coordinator: Hiroaki Hase (ext. 6628)

Each local authority has conducted water quality surveys of radioactive materials at bathing areas this summer; the results reported to the Ministry of the Environment by each prefecture have been compiled and are released here.

### 1. Survey Overview

Number of surveys: Surveys conducted at 551 bathing areas, etc. in 37 prefectures.

Subject of survey: Water quality (radioactive materials) at bathing areas (radioactive iodine and radioactive cesium)  
Spatial dose-rate of beaches at bathing areas

Survey period: Late May – Early October

### 2. Outline of Results

-In regard to the radioactive materials in water in bathing areas, there were no reports of detectable radioactive materials except for one location (Nakoso Bathing Beach in Iwaki City, Fukushima Prefecture).

The readings of the Nakoso Bathing Beach was below the general target for water quality (radioactive materials) at bathing areas.

\*General target for water quality (radioactive materials) at bathing areas

Total for Cs-134 and Cs-137: 50Bq/L

I-131: 30Bq/L

-There were no reports of spatial dose-rate of beaches being higher than that of surrounding areas.

The compiled results are available at <http://www.env.go.jp/jishin/rmp.html#monitoring>.

For details of the survey results for individual bathing areas, please contact the local authority, etc. where the bathing area in question is located.

## Air Dose Rate in FY2011

Prefecture	Municipality	Bathing Area	Readings (μSv/h)			Air dose rate at the nearest monitoring post					Number of times of monitoring conducted at each area	Monitoring date
						Readings (μSv/h)				Monitoring point
