STAKEHOLDERS MOVEMENT ON MANAGING NATIONAL PARK

World Education NGO is implementing ICDP (Integrated Conservation Development and Empowering) program in Local Community TNTP

NATIONAL PARK AND ITS STRATEGIC FUNCTION

National Park:

to preserve beautiful scenic areas, forest ecosystem, and special natural movement.

Its Strategic Function:

to protect catchment area; hydrology; watershed; to produce O₂ (Carbon sink); cultural and historical value; socio-economic; educational; ecological services; research; eco-tourism, etc.

The mission:

to conserve natural resources and to provide public with access to nature for their enjoyment.

PARTNERSHIP MANAGEMENT AMONG STAKEHOLDERS

In case of Yakushima (NP and WH):

- 1) Ministry of Environment with Forestry Agency to name various of trees, plants, forest boards, constructing feet steps and to reduce the number of deer and monkey. Because their population are threaten plants, trees and farmers farm.
- 2) Ministry of Environment Officer with Local Government Yakushima to construct and maintain street for transporting passengers/tourist until national park and world heritage area.
- 3) Local Government with Tourist Agency Association to keep and disseminate regulation on maintaining forest ecosystem. For instance: to bring “portable toilet’ every tourist to Jomonsugi.
- 4) Park Management Officer with Ministry of Environment to sell ticket, keeping security, to arrange parking area, constructing shelter and chairs including recreation area.

COLLABORATIVE MANAGEMENT

In case of Indonesia (TNTP):

- 1) National Park Office with Friends of National Park Foundation (FNPF) on animal breeding, forest rehabilitation and reforestation program;
- 2) World Education (USA) with Directorate General of Forest Protection and Natural Conservation (PHKA Directorate General) and Local Government on making conservation and empowering local communities (education, poultry and agricultural program);
- 3) National Park Office with Orangutan International Foundation and Yayasan/Yayasan Orangutan Indonesia) to make care center and rehabilitation on Orangutan;
- 4) National Park Office with Illegal Logging Response Center/ILRC, local government and Police Regency Office to stop and crush actors for illegal logging activities

COMPARATIVE HISTORICAL, INSTITUTION, THE AREA WIDTH

JAPAN

Established in 1931 (law).

Location: in Conservation Forest

The total width : 5.4 million ha

Number: 401 units park. National Parks
30 units; Quasi-National Park 56;

Prefectural Natural Parks 315.

Institution: The natural Environment Bureau,
Ministry of Environment (MOE)

e.g. Yakushima area 31,015 ha

Various of plants, trees, animals.

Table 1 Table of Area Figures for Natural Parks (ha)

Classification	Number of parks	Area of park	Percentage of total land area
National parks	30	2,091,163	5.533
Quasi-National Parks	56	1,362,613	3.606
Prefectural Natural Parks	315	1,977,528	5.233
Total	401	5,431,304 1)	14.372

Yakushima

Japan

Yakushima area 31,015 ha

Protected area management:

- ❖ Wilderness area (1,219 ha): it has not been affected by the activities of human beings. It needs for natural environment to be conserved.
- ❖ National Park and World Heritage for eco-tourism (15,185 ha). e.g. Jomonsugi (5,000 yo), Kigen Sugi (3,000 yo,) in WH. Yakusugi land in National Park e.g.-Hahakosugi Cedar (2,600 yo), Buddasugi (1,800 yo), Tenchusugi (1,500 yo), plants and animals (deer and monkey).
- ❖ Forest Ecosystem Reserve: to protect plants and animals. Yakushima Forest Agency (Responsible).
- ❖ Natural Monuments: The Minister of Education (use HAKI) to decided certain animals, plants and trees as natural monuments.
-e.g. Jomonsugi (trees), Umigami (big turtle sea), plants.

THE MOST FAVORITE AREA

- ❑ World Heritage in Shiratani Unsuikyō: Jomosugi, Kigensugi, Mt. Miyanoura dake (1,935 m), etc.
- ❑ National Park in Yakusugi land: Arakawa forest path, Hahakosugi, Buddasugi, Tenchusugi, etc.

The key success of Yakushima management:

- ❖ -Professional: among stakeholders management.
- ❖ -Budget sufficient.
- ❖ - implementation of Law enforcement.

Indonesia: National Parks

- ❖ Total national parks are 50 units
 - ❖ World Heritage 6 units
 - ❖ Biosphere 6 units
 - ❖ Wetlands 3 units
 - ❖ Largely marine Parks 9 units
- In National Parks there are several zone:
- 1) Core or Nucleus zone : Wilderness area.
 - 2) Research zone: to develop research areas.
 - 3) Utilization zone ; to establish infra structure facilities (accommodation for visitors, museum.
 - 4) External zone/Buffer zone

CONCLUDING REMARKS

- ❑ The strategic function of National Park is to protect catchment area, hydrology, watershed, to produce O₂ (carbon sink), to keep storage of biodiversity, educational, ecological services, research, eco-tourism, etc.
- ❑ Illegal logging occurred in Tanjung Puting and giving Logging Concession for cutting yakusugi trees in Yakushima National Park by Taisho government that subsequently affect on environmental damage for instance deforestation, flood, soil erosion, loss of biodiversity, lack of water in drought time, air pollution.
- ❑ Protected area is maintained by 'partnership' management among stakeholders in Yakushima National Park and World Heritage. It affects to booster tourist visiting Yakushima and has implication for extend of regional income for Yakushima government office and income generating for local community due to tourist services.

CONTINUE

❑ In contrast, Tanjung Puting is less developing in terms of protected area management through 'collaborative' management due to accountability and transparency management among stakeholders. This phenomenon eventually affects the lack of overseas and domestic tourists visiting Tanjung Puting and the regional income for local government (Kotawaringin Barat). Besides, lack of income generating for local community due to constraint
