

MESCOT Habitat Restoration in Kinabatangan, Supu Forest Reserve, Sabah, Malaysia

Mohd Hasim Abd Hamid
Chairman, KOPEL Berhad

What's in the Presentation

1. Introduce Kinabatangan & Batu Puteh
2. The MESCOT Program & What we do...
3. Conservation Activities
4. Community & Economic Impact
5. Partnership & Collaboration

Location : Kinabatangan

Floodplain Forest Types: Peat Swamp & Freshwater Swamp

High Biodiversity & High Concentration of **Wildlife**

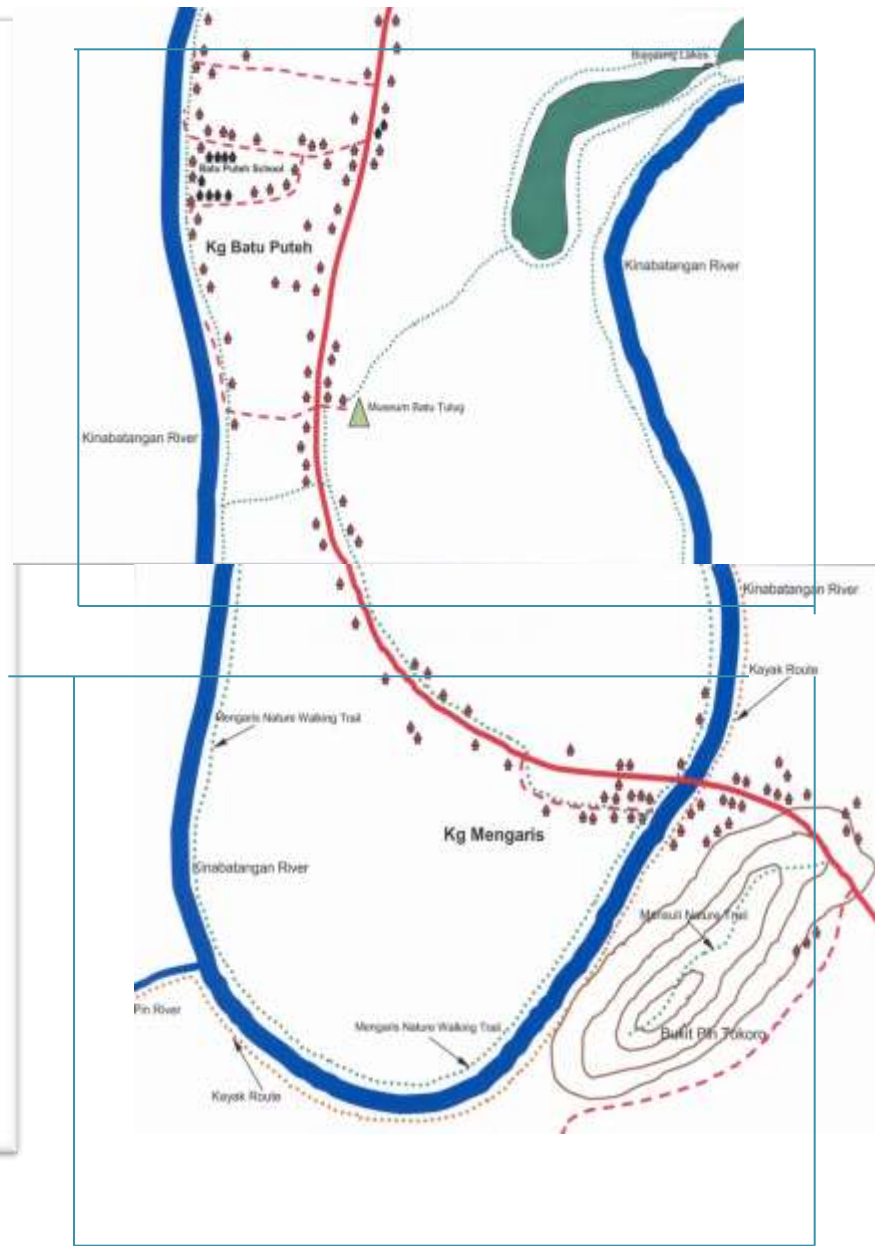

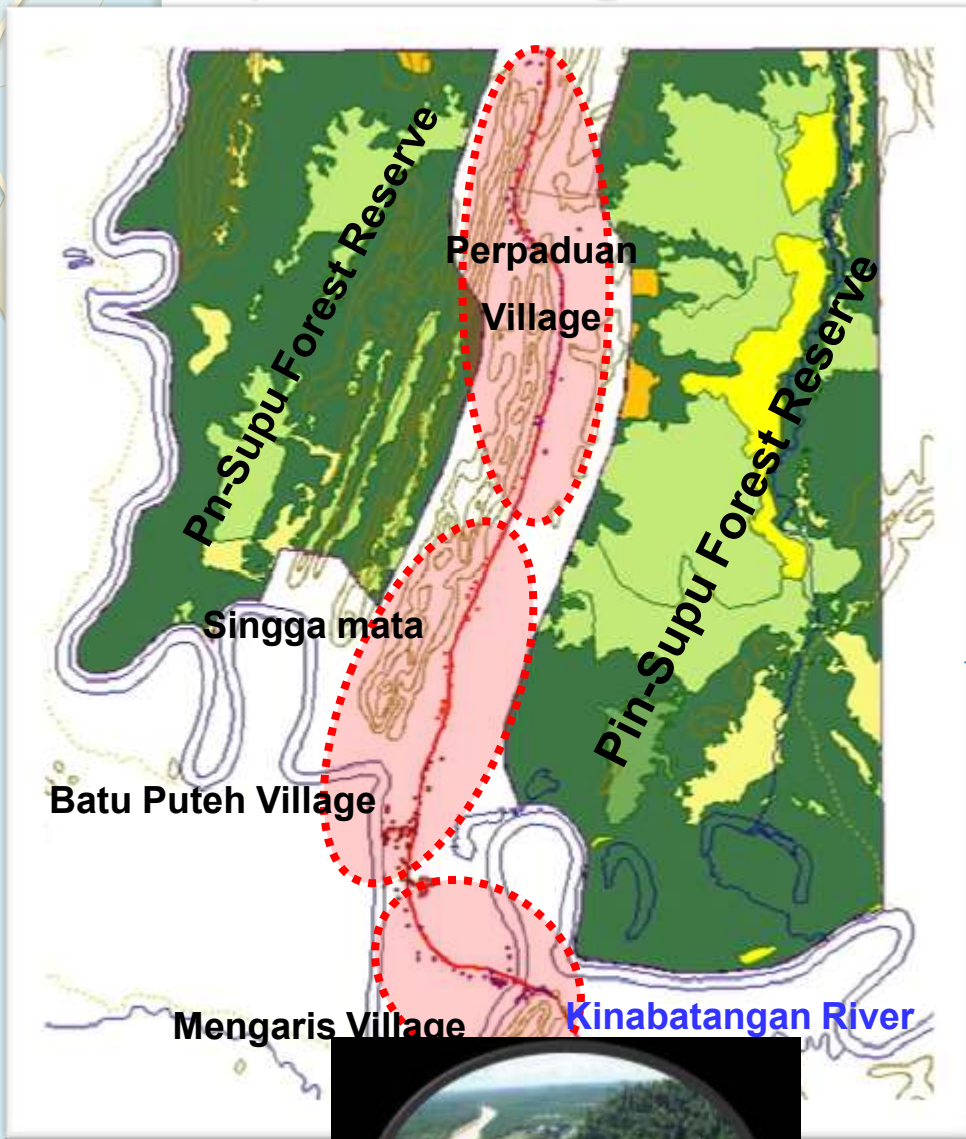

Natural Heritage...

Representative of almost all Lowland Bird Species of Borneo

Map of the Village

Cultural Attractions

- Over 10 Language Groups
- Unique Stories, Art & Dance
- Traditions still alive & intact
- Unique knowledge of Environment
- Historical Sites – Batu Tulug

What are we Doing to Protect & Develop this area ?

MESCOT Project

Forest Restoration

ENVIRONMENT

SECTION 2/3

Taking charge of their future

By MASJALIZA HAMZAH

KAMPUNG Batu Putih is in many ways a typical (river people) settlement by the Kinabatangan, Sabah's longest river. The villagers depend on the surrounding environment for much of their shelter and subsistence needs, while deriving cash income from a variety of jobs like clearing land, fish farming and

Awang Agelik who ventured as far as Kuala Lumpur for a job, he has now found a good reason to stay in his kampung by the river that had, for a long time, been plagued by problems arising from idle youths looking for ways to keep themselves occupied.

Some of the youths in the village had become drug users, turning to glue-sniffing and syabu (crystal-meth, also known as "ice"). It's not good for the village when people are not motivated. But now there is some hope for the young people in the village.

Awang and his fellow villagers hope to benefit from the Mesocot community

MESCOT ?

MESCOT Started March 1997

Renovated old building to carry out training and village level discussion

MESCOT?

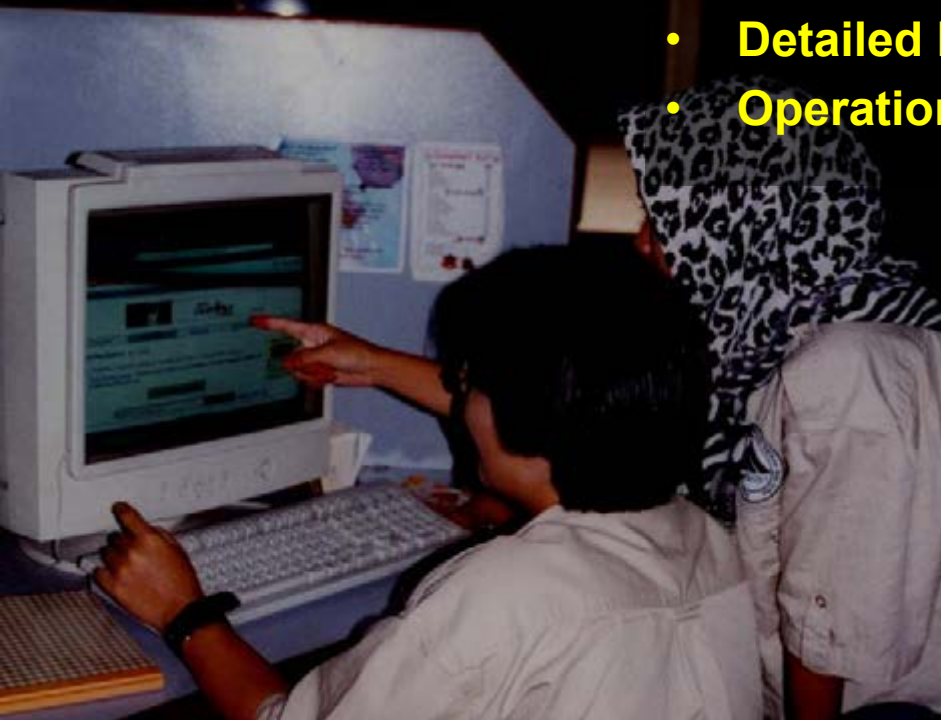

(MODEL ECOLOGICALLY SUSTAINABLE COMMUNITY AND TOURISM)

- ❑ The MESCOT initiative was designed to **empower local people, build local capacity, and plan ecologically sustainable community based ecotourism activities**, whereby creating alternative sources of income and at the same time benefit the conservation of the remaining rich natural forest resources and biodiversity of the area.
- ❑ Bottom-up Planning Process
- ❑ involvement of Local Community through participatory planning

Establishment Phase

- Research
- Exposure
- Brainstorming
- Detailed Planning
- Operations

Begin Operation – June 2000

Ecotourism Activities

- Boat Trips
- Wildlife Observation
- Tree Planting
- Homestay & Culture
 - Cooking Lessons
 - Traditional Games
 - Traditional Music & Dance

Miso Walai Homestay

Cultural dance ...

Jungle Trekking Nature Interpretation Walks

Hammock and Tent Camping

Caves Exploring

Forest Restoration

Tree Planting Activity

Research Tourism

- Wildlife Monitoring
- Water Quality
- Forest Mapping

Alongside this we have also got involved in conservation activities..
