

Hidakasanmyaku Erimo Tokachi National Park

Hidaka mountain range is
” The backbone of Hokkaido”

Hidakasanmyaku-Erimo-Tokachi National Park, centered on the Hidaka Mountains which stretch 140 km from north to south, is located in the south-central part of Hokkaido. It is the largest national park in the land area in Japan. The park is home to the highest peak in the Hidaka Mountains, Mt. Poroshiri (2,052 m), and a series of mountains over 1,900 m above sea

level, where Japan’s most pristine natural environment remains. The coastal area also has distinctive features such as marine terraces, sea cliffs, and reefs. Cape Erimo, is an example of such feature. Moreover, from the vast Tokachi Plain, visitors can enjoy breathtaking views of majestic mountain scenery.

Date of Designation :
June 25, 2024

Area : 245,668 ha (land area)

Itinerary

Mountain range known as the backbone of Hokkaido stretching from the inland region to the sea

Hidakasanmyaku-Erimo-Tokachi National Park situated in south-central Hokkaido is the largest national park in terms of land area in Japan. The park is home to Mt. Poroshiri, which is the highest peak in the Hidaka Mountain Range (elevation of 2,052m), stretching north to south approximately 140 km from the ocean to the mountains, and other tall mountain peaks rising to 1,900m. Japan's most primitive natural environment remains in the park. The ocean side also offers spectacular picturesque views of marine terraces, sea cliffs, and rock reefs as well as Cape Erimo located at the south end of the park. A panoramic mountainous landscape can be seen from the massive Tokachi Plains.

web site

Day 1

Prepare to be amazed by the panoramic view of the Hidaka Mountain Range and Tokachi Plains, learn the history of accidents in the mountains, and enjoy the blessings (cuisine) of Mother Nature

- 9:00 ● Tokachi Obihiro Airport departure
